

## Vantage Infrastructure confirms commitment to ESG

**London, 18 June 2018** - As part of the firm's steady endeavour to foster sustainable investment and asset management practices across its debt and equity managed portfolios, Vantage Infrastructure has become a signatory of the United Nations-supported Principles for Responsible Investment (PRI). This follows Vantage becoming a member of GRESB<sup>1</sup> in April 2018.

"As a business, we have been focussed on ESG for a long time, also under our prior ownership, in everything we did and do as investment managers", **said Valeria Rosati, Senior Partner, Vantage Infrastructure**. "This spans across both our debt and equity businesses, from the origination stage of an investment, through the due diligence phase and across the whole asset management cycle. Under our new ownership structure, we have renewed our memberships and commitment to these essential principles of responsible and, ultimately, sustainable investment. We have in place, and continue to develop, a range of internal ESG projects, as we think the bar in infrastructure can be raised and we certainly intend to do our part as active investors."

"We are delighted to welcome Vantage as a PRI signatory," **said Fiona Reynolds, CEO of the PRI**. "Vantage's passion for ESG demonstrates the growing importance of sustainable investing in delivering relevant solutions to infrastructure investors."

The PRI is the world's leading initiative on responsible investment. The Principles for Responsible Investment are a voluntary set of investment principles for incorporating environmental, social and governance issues into investment practices. In implementing the principles, signatories contribute to developing a more sustainable global financial system. The principles have signatories including asset owners, investment managers and service providers from over 50 countries.
